

# Infant and Child Car Seat Recycling Event

Organized by Titanium Titans Robotics, in support of Canonsburg Mayor Rhome's recycling efforts. Proceeds go toward offsetting recycling costs and to support the Titanium Titans Robotics Program.

Bring your outgrown or expired infant and child car seats to recycle!

Americans purchase 12 million car seats per year. Car seats expire in 6 years, primarily due to degrading plastic. Six years later there are 142 million pounds of solid waste produced from a single year's sales.

**When:** Saturday, November 24th, 10:00am - 1:00pm

**Suggested donation:** \$10 per car seat.

**Where:** Canonsburg Borough Building, 68 E Pike St, Canonsburg, PA 15317 Parking Lot

## By recycling your car seat you can:

- Prevent the reuse of expired car seats, which are dangerous to use as their protective plastics degrade quickly.
- Keep car seats from overflowing in landfills while simultaneously recycling the materials that can be used in other products.
- Reduce the negative environmental impact of car seats that are unable to be donated at all, and unable to be resold after expiration.
